GUIDELINES FOR KINDERGARTEN EARLY ENTRANCE

Early Entrance to Kindergarten determinations are based upon the premise that each student shall be challenged and supported in his/her most appropriate placement for learning. In such an instance, when a student who has not yet reached the typical age at which students are admitted to Kindergarten, and a request has been made for evaluation for early entrance to Kindergarten, the following procedures and guidelines shall be followed:

- Regular Kindergarten enrollment requires children to be 5 years old by September 30. Parents or legal guardians for a child who is 5 years old after September 30 and before January 1 of the school year for which admission is sought, shall be evaluated upon the request of the child’s parent or legal guardian. *Annual deadline for early kindergarten enrollment is the Friday before the first day of school.

- Upon receipt of the parent request, the school will provide an Early Kindergarten Entrance packet to parents. This includes an Early Entrance to Kindergarten Flowchart, Kindergarten Early Entrance Application, Kindergarten Readiness Checklist and additional Kindergarten Early Entrance information. Parents should complete the application and checklist with an additional checklist completed by another person who knows the child well such as a preschool teacher, pediatrician, and/or day-care provider, if possible.

- Upon receipt of the application and checklists by the school, the parents will be contacted to review the information and criteria for Early Entrance. All information provided in the application and checklist should be truthful. An appointment will be made to complete a cognitive assessment. *All information provided must be answered as accurately as possible. GALA reserves the right to reverse early kindergarten admission decisions if it is determined at a later time that intentional false information was provided.

- If the child obtains a score of at least 41 on the Kindergarten Readiness Assessment (KRA), then the school will consider early kindergarten entrance. If the child scores below 41, the school will not consider early kindergarten entrance.

- If the child scores at least 41 on the KRA, the Kindergarten Early Entrance Team will meet with parents to consider all information (Application, Checklist, Assessment) and make a determination as to whether or not the child demonstrates strong indicators that early kindergarten entrance is essential to the child’s learning and in his/her best interests. Written outcomes will be given to parents and records are kept at the school about the appropriateness of Kindergarten Early Entrance.

- A parent or legal guardian of the referred child may appeal in writing the decision of the Kindergarten Early Entrance Team to the Principal within 30 days of being notified of the team’s decision. The Principal shall review the appeal and notify the parent or legal guardian who filed the appeal of his/her final decision within 30 days of receiving the appeal. The Principal’s decision shall be final.
